COVID TESTS
LONDON**

ON-SITE TESTING

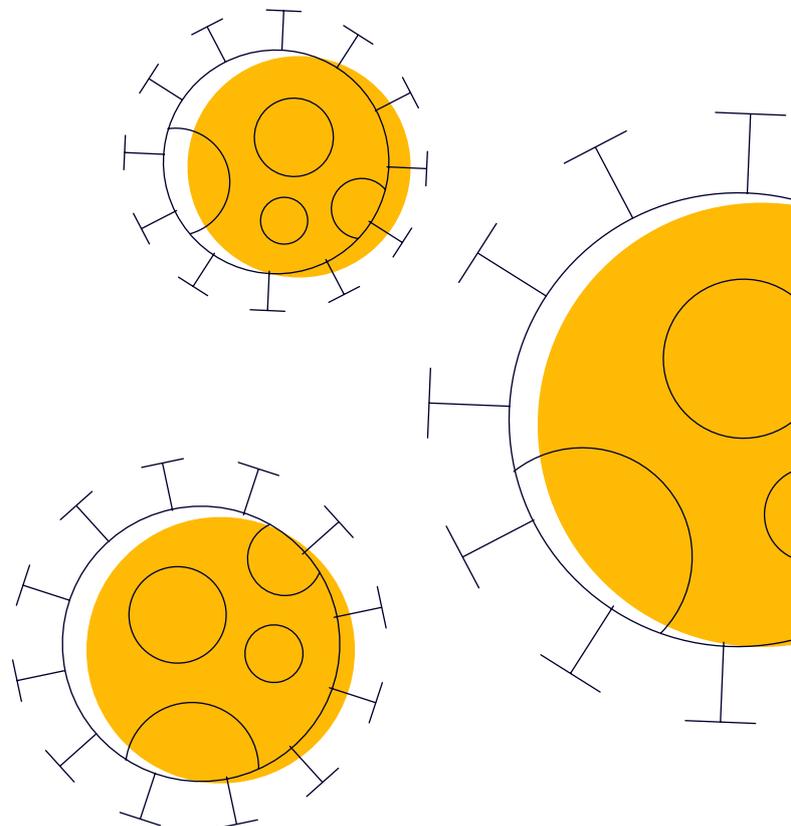

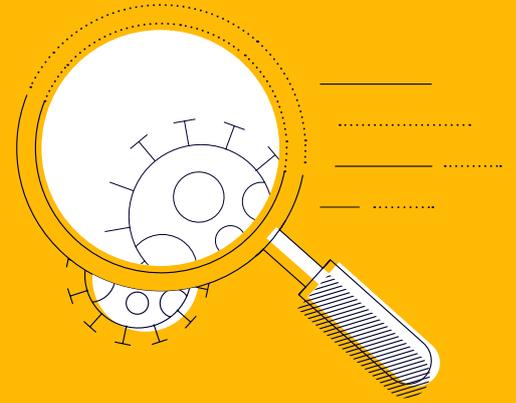

Introduction

On-site testing is convenient and efficient, helping to keep everyone safe and providing reassurance for those visiting or working at the location.

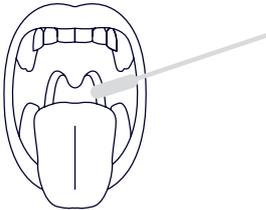

Location testing is ideal for organisations who need to safely bring large numbers of people together in one area, allowing that place of work, study or entertainment to, once again, function effectively. Instant Covid Tests London stands out from the competition by utilising revolutionary, Virolens™ testing devices. These generate individual positive/negative results in just 20 seconds, are non-invasive and generates a result that can be relied upon.

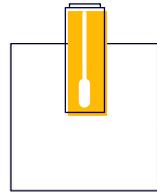

What is Virolens™?

Our Virolens™ devices will tell you whether or not you have Covid-19 at the time of your test. It doesn't tell you whether you have already had the virus, only whether you have it at the exact time of testing. Virolens™ gives you positive/negative Covid test results in just 20 seconds. **This is how our quick and simple private Covid testing process works:**

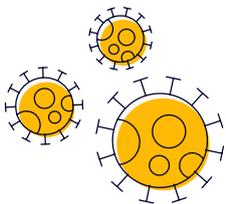

1 You take your own saliva sample with the mouth swab provided and place it into a testing cartridge.

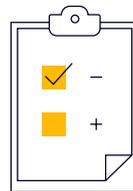

2 A Virolens™ operator seals the cartridge and puts it into the Virolens™ device.

3 Your sample is examined by a holographic microscope, which looks at the light diffracted off the surface of each saliva component.

4 This holographic imaging is then run through an artificially-intelligent computer trained to detect SARS-CoV-2 (Covid-19).

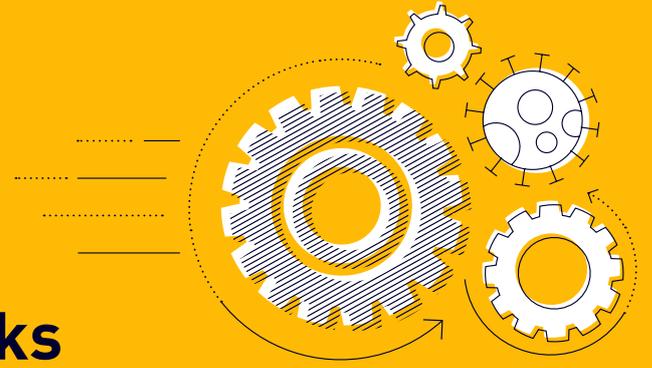

5 The device then returns a positive/negative result for Covid within just 20 seconds.

Benefits of on-site testing with Instant Covid Tests London

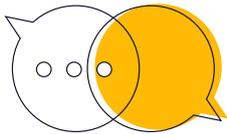

- Non-invasive test – just a simple mouth swab
- No waiting for test results – get your answer in just 20 seconds
- Industry-leading accuracy – so you can have confidence in your results
- Full post-test support for anyone testing positive
- High volume, rapid testing for the entire organisation, with the ability to scale as needed
- A fully inclusive service with all necessary infrastructure supplied, including testing booths and IT systems
- Dedicated booking portal for easy management and compliance with Government data reporting requirements
- We provide a highly trained team of manager, technicians, and operators
- A robust healthcare management system, underpinned by BSI certification and UKAS accreditation

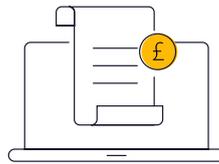

How on-site testing works

We have designed our on-site Covid testing process to be as quick, simple and convenient as possible, even for large volume testing. Here's how it works:

1 Get in touch or complete the online corporate enquiry form.

A member of our team of experts will contact you to discuss your needs.

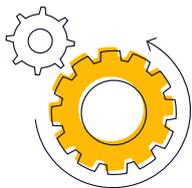

2 Our team will make an assessment of your site either by visiting or an online consultation.

We'll create a fully inclusive, bespoke testing package for your business with a simple, transparent price-per-test based on a minimum volume of tests and the number of weeks required.

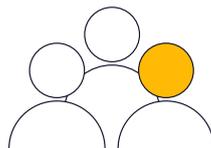

3 If you're happy to go ahead, we'll carry out all the advanced planning including health and safety, infrastructure, the flow of people, staffing and PPE.

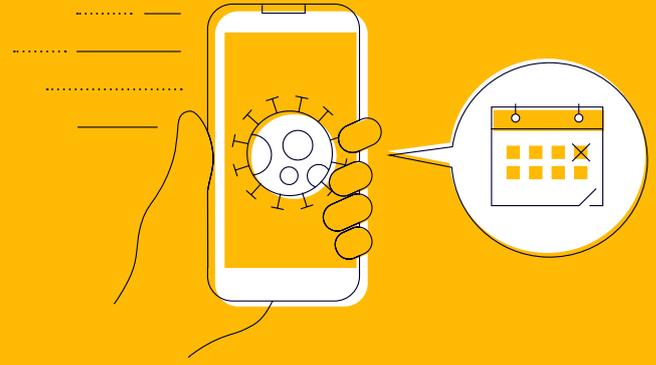

We'll set up your own private online, GDPR-compliant and secure portal with a booking system and direct reporting to PHE.

4 We work alongside your team to manage the install and set up.

5 Our team will be ready on-site throughout your agreed testing period, ready to start implementing your location testing program.
